Question:53

The exhibit shows output from a Mobility Master (MM) dashboard. What is a valid reason for the administrator to click the akamai square under applications?

- A. to see the break down for only the roles, destinations, WLANs, and devices that use this application
- B. to download a report about the usage of this application over time
- C. to create filter rules in order to control wireless user access to this application
- D. to set up bandwidth rule in order to control wireless user access to this application

Answer: A

Question: 54

What is the difference between how a network administrator can monitor clients in the Mobility (MM) interface and in the AirWave Management Platform?

- A. AirWave shows trends for the past several minutes, while MM shows longer trends.
- B. AirWave combines information from more sources, such as RADIUS authenticating servers and APs.
- C. AirWave shows the current signal level for the client connection, while MM does not show RF statistics.
- D. MM shows user and role information associated with clients, while AirWave does not.

Answer: B

Question: 55

An AP operates on channel 6. Which device causes the most significant and consistent interference with the signal?

- A. cellular phone
- B. AP operating on channel 11
- C. wireless security camera operating on channel 8
- D. weather radar

Answer: C

Question: 56

A network administrator configures an Aruba Mobility Master (MM)-based solution to provide wireless access to employees. The solution must meet these criteria:

Authenticate users to a network RADIUS server

Enforce different Aruba firewall rules based on the user department

How can the administrator meet these criteria in the simplest way?

- A. Create a different WLAN and SSID for each department. Apply different firewall policies to each WLAN.
- B. Have the RADIUS server send different roles for users in different departments. Apply role-based firewall policies.
- C. Create multiple zones on the MM. Assign different departments are sets of firewall policies to different zones.
- D. Have the RADIUS server assign users in different departments to different VLANs. Apply firewall policies based on IP ranges.

Answer: B

Question: 57

A network administrator configures this policy:

```
ip access-list session Guest
    user any svc-dhcp permit
    user any network 10.0.0.0 255.0.0.0 deny
    user any any permit
```

Users to which this policy apply are unable to receive IP addresses with DHCP. How should the administrator fix the issue?

- A. Move the user any svc-dhcp permit rule to the bottom of the list.
- B. Remove the deny rule from the policy.
- C. Use the correct service alias in the user any svc-dhcp permit rule.
- D. Change user to any in the user any svc-dhcp permit rule.

Answer: C

Question: 58

An Aruba solution runs ArubaOS 8 and uses a mobility master architecture. Which feature can network administrators use to balance wireless across APs on different channels?

- A. AppRF
- B. ARM
- C. Client Match
- D. AirMatch

Answer: C

Question: 59

A network administrator creates the role employees and adds this rule to it: user any any permit

The first several wireless clients assigned to the employees role are assigned IP addresses in the 10.10.10.0/24 subnet. Several other wireless clients with the employees role are then assigned IP addresses in the 10.10.20.0/24. When the Aruba firewall matches traffic from these clients to the user any any permit rule, what does it do?

- A. It permits traffic from wireless clients in both the 10.10.10.0/24 and 10.10.20.0/24 subnet as long as the packet has a source IP.
- B. It permits the traffic from wireless clients in the 10.10.20.0/24 subnet, but drops the traffic from wireless clients in the 10.10.10.0/24 subnet.
- C. It drops traffic from wireless clients in both the 10.10.10.0/24 and 10.10.20.0/24 subnet.
- D. It permits the traffic from wireless clients in the 10.10.10.0/24 subnet, but drops the traffic from wireless clients in the 10.10.20.0/24 subnet.

Answer: A

Question: 60

A company has many 7220 controllers in its Aruba wireless architecture. A network administrator wants to use the Traffic Analysis dashboard in order to monitor which type of applications are being used by wireless users. What is required for this implementation?

- A. AirMatch and ClientMatch must be enabled.
- B. The solution must have active PEFNG licenses.
- C. WLANs must use the decrypt-tunnel forwarding option.
- D. Firewall policies must include application filtering rules.

Answer: B

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
